

SAFE

mycotoxin binders

IN CONSTANT EVOLUTION SINCE 1993

Since its original launch in 1993, we have been constantly improving the formulation of SAFE, our pioneering mycotoxin binder, through continuous R&D efforts.

EUROPEAN QUALITY - ITALIAN THINKING

High quality standards and Italian know-how make SAFE the most effective solution against mycotoxins.

IRREVERSIBLE MYCOTOXIN BINDING

Our SAFE line of products employ an adsorption mechanism. This means they act by binding mycotoxins to their surface. The stable bond formed ensures that the sequester of the toxins is irreversible.

CERTIFIED BY LEADING INDEPENDENT INSTITUTES

SAFE's effectiveness as an adsorbent has been extensively documented and certified by ISPA-CNR Bari, the Institute of Food Production Sciences, with which NFT enjoys a long-standing working partnership.

MULTI-COMPONENT SYNERGY

A pioneering innovation when it was first introduced in the 1990s, the concept of combining multiple components in a single product has proven a winning strategy, offering complete protection against the toxins commonly found in feed and raw materials.
